

Read communication timeout status

 dexterindustries.com/GoPiGo/learning-2/python-programming-for-the-raspberry-pi-gopigo/read_timeout_status/

Reads status register on the GoPiGo and returns the status of the communication timeout

Syntax

```
read_timeout_status()
```

Parameter:

None

Return:

0 if the communication timeout has occurred, else 1

Example

```
from gopigo import *  
print read_timeout_status()
```
