led_off()

Turn LED off

You can turn off any of the LED on the GoPiGo using this function.

Syntax

```
led_off(led_id)
```

Parameter:

led_off: LED_L or 1 for left LED and LED_R or 0 for right LED

Return:

1 on success

-1 on error

Example

```
from gopigo import *
led_off(LED_L)
led_off(LED_R)
```
